**Bee Keeping in North Carolina - A Study of Some Statistics on the Industry with Suggestions and Conclusions** - Sherman Franklin - 2017-09-21

This is a study of reports from 360 American bee-keepers concerning different types of bees, how and where the highest yields are achieved, the development of techniques, best honey-plants, and much more. Based on information from the owners of over 10,400 colonies, the results of this study will be of considerable utility to both those who keep bees for pleasure and for profit. Contents include: "Summary of Bulletin", "Introduction", "Principal Honey Sections of State", "Races of Varieties of Bees", "Prices for Honey", "Comb Honey", "Leading Honey Plants", "Types of Hives", "Bee-moth and Other Enemies", "Bee-keeping Journals", "Summary of Bee-keeping in the State", "What Encouragement Can be Given", etc. Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this volume now in an affordable, modern, high-quality edition complete with a specially commissioned new introduction on Bee-keeping.

**Ethical and Legal Issues in Neurology** - James L. Bernat - 2014-01-09  
Advances in our understanding of the brain and rapid advances in the medical practice of neurology are creating questions and concerns from an ethical and legal perspective. Ethical and Legal Issues in Neurology provides a detailed review of various general aspects of neuroethics, and contains chapters dealing with a vast array of specific issues such as the role of religion, the ethics of invasive neuroscience research, and the impact of potential misconduct in neurologic practice. The book focuses particular attention on problems related to palliative care, euthanasia, dementia, and neurogenetic disorders, and concludes with examinations of consciousness, personal identity, and the definition of death. This volume focuses on practices not only in North America but also in Europe and the developing world. It is a useful resource for all neuroscience and neurology professionals, researchers, students, scholars, practicing clinical neurologists, mental health professionals, and psychiatrists. A comprehensive introduction and reference on neuroethics Includes coverage of how best to understand the ethics and legal aspects of dementia, palliative care, euthanasia and neurogenetic disorders Brings clarity to issues regarding ethics and legal responsibilities in the age of rapidly evolving brain science and related clinical practice

**Foreign Missions** - R. H. Malden - 2015-07-05

Excerpt from Foreign Missions: Being a Study of Some Principles and Methods in the Expansion of the Christian Church The following pages are merely an essay. They can lay no claim to completeness, and more experienced eyes will convict them of many inadequacies besides those of which I myself am conscious. We may sometimes be irritated by the seeming lethargy of our Church, and its activity in the Mission Field does not always compare favourably with that of some other communions. But it is probably true to say that the Church of England takes more interest in the Mission Field now than it has done at any period since the Norman Conquest. Missionary meetings are many, and the output of missionary literature of various kinds has become so large that it is impossible to maintain an acquaintance with it all. To prevent being lost in a maze of detail, I have tried to consider the missionary work of the Christian Church as a whole. I have tried to set forth shortly the grounds upon which

and to offer some suggestions as to methods of maintaining and extending interest in missions, and of equipping missionaries for their work.
