**Policing South Africa** - Gavin Cawthra - 1993

**South Africa, a Country Study** - Harold D.
Policing in South Africa has gained notoriety through its extensive history of oppressive law enforcement. In 1994, as the country’s apartheid system was replaced with a democratic order, the new government faced the significant challenge of transforming the South African police force into a democratic police agency—the South African Police Service (SAPS)—that would provide unbiased policing to all the country’s people. More than two decades since the initiation of the reforms, it appears that the SAPS has rapidly developed a reputation as a police agency beset by challenges to its integrity. This book offers a unique perspective by providing in-depth analyses of police integrity in South Africa. It is a case study that systematically and empirically explores the contours of police integrity in a young democracy. Using the organizational theory of police integrity, the book analyzes the complex set of historical, legal, political, social, and economic circumstances shaping police integrity. A discussion of the theoretical framework is accompanied by the results of a nationwide survey of nearly 900 SAPS officers, probing their familiarity with official rules, their expectations of discipline within the SAPS, and their willingness to report misconduct. The book also examines the influence of the respondents’ race, gender, and supervisory status on police integrity. Written in a clear and direct style, this book will appeal to students and scholars of criminology, policing, sociology, political science, as well as to police administrators interested in expanding their knowledge about police integrity and enhancing it in their organizations.

Crime and Policing in Post-apartheid South

"[A] cogent and well-informed discussion of the

organisational problems it faces." -- Stephen Ellis
Since the mid-1990s, South Africa has
experienced a crime wave of such unprecedented
proportions that the ability of the new democracy
to form a stable civil society and govern
effectively has been called into question. In this

timely book, Mark Shaw describes how a police force that was so effective under apartheid became so ineffectual in the face of rising crime. He shows how an increase in violent crime shapes society, police, and government, and discusses possible solutions for the current crisis. International crimes such as war, terrorism, and organized crime are explored along with crimes that affect individual security, such as armed robbery, murder, and rape. Crime and Policing in Post-Apartheid South Africa draws attention to both the national and the international dimensions of crime in this society in transition.

**Black and Blue** - John D. Brewer - 1994
This book is the first thorough study of the origins and development of one of the world's most controversial police forces. It places current allegations of misconduct in the context of the police's role in upholding and implementing state policies of internal colonialism. It addresses the vexed question of police reform now that state policies have changed.

Community Policing - Mike Brogden - 2013-01-11
Community policing has been a buzzword in Anglo-American policing for the last two decades, somewhat vague in its definition but generally considered to be a good thing. In the UK the notion of community policing conveys a consensual policing style, offering an alternative to past public order and crimefighting styles. In the US community policing represents the dominant ideology of policing as reflected in a myriad of urban schemes and funding practices, policy-making, strategies and tactic. But it has also become a massive export to non-western societies where it has been adopted in many countries, in the face of scant evidence of its appropriateness in very different contexts and surroundings. critical analysis of concept of community policing worldwide assesses evidence for its effectiveness, especially in the USA and UK highlights often inappropriate export of community policing models to failed and transitional societies.

**Mean Streets - Life in the Apartheid Police (Book 3) the Laughs** - Jacobus Kotze - 2014-09-03
The Mean Streets Books are about the service years of the author in the South African Police Force - 1985-1991. The Police Force had almost nothing in common with a Sheriff's Department. The policemen were fighting as light & mechanized infantry besides being policemen. We dealt with violent crime, counter-terrorism, counter-insurgency and full scale riots on a daily base. It is much more than a biography about policing the mean streets - the books explain how an honourable police force became an "instrument of terror." It is a stark warning on what happens when unscrupulous politicians get control of a highly disciplined police force and there is no Bill of Human Rights to stop them from implementing the laws, no matter how

Though not everyone will agree with the policemen's sense of humor, it is fun to read.

Culture, Organization, and Management in South Africa - Marja Spierenburg - 2006
South Africa is celebrating its first decade of democratic freedom. It therefore seems appropriate to examine in more detail how South Africa has tried to restore some of the many social injustices caused by the former apartheid regime. This book offers a view into the world of organisation and management from a cultural perspective. The authors investigate how initiatives and policies with the aim of generating more employment equity have been developed, implemented and have worked out in various sectors of the South African economy. The various chapters present in-depth case studies
local NGOs, universities and tourism. The book reveals in detail the local struggles of the historically disadvantaged and the "powers-that-be", to try and live up to the ideals of the New South Africa.

The Police, Public Order and the State - John D Brewer - 2016-07-27

Are police forces agents of the state or of society? How do different police forces maintain order? How does the nature of a country's political system affect the state's reaction to disorder? This study identifies trends in public-order policing across a broad sample of seven countries: Britain, Northern Ireland, the Irish Republic, the United States of America, Israel, South Africa and China. It explains why the handling of disorder has become a controversial and topical issue in different parts of the world. Each chapter provides a range of data on the size, make-up and cost of the police and follows a common format in analysing the place of the police at the junction of state-society relations.

Measuring Police Integrity Across the World
- Sanja Kutnjak Ivković - 2015-06-10
This book brings together research on police integrity on regions worldwide. The results for each country indicate whether police officers know the official rules, how seriously they view police misconduct, what they think the appropriate and expected discipline for misconduct should be, and how willing they are to report it. Police misconduct refers to everything from corruption and use excessive force, to perjury, falsification of evidence, and failure to react. Police Integrity and police misconduct are topics of great concern worldwide. Police integrity is envisioned as the inclination to resist temptations to abuse the rights and privileges of police occupation. Using their extensive experience studying police integrity in the United States, the editors have created an applicable framework for measuring police integrity in other countries. The results of their research are brought together in this timely volume, including contributions from both established democracies and countries in transition, which each present unique challenges for improving police integrity. Each chapter

In the last chapter, editors Kutnjak Ivković and Haberfeld take a comparative look across the countries by engaging in the in-depth comparative analysis. This work will be of interest to researchers and policy-makers studying policing both in the United States and internationally, presenting a theoretical framework that can be applied to other regions for further research.

**Policing for a New South Africa** - Mike Brogden - 2005-08-04
First published in 1993. Routledge is an imprint of Taylor & Francis, an informa company.

Once a marginal political issue, crime control now occupies a central place on the social, political and economic agenda of contemporary liberal democracies. Nowhere more so than in post-apartheid South Africa, where the transition from apartheid rule to democratic rule was marked by a shift in concern from political to criminal violence. In this book Anne-Marie Singh offers a comprehensive account of policing transformations in post-apartheid South Africa. Her analysis of crime and mechanisms for its control is linked to an analysis of neo-liberal policies, providing the basis for a critique of existing analyses of liberal democratic governance. Themes addressed in the book include the exercise of coercive authority, state and non-state expertise in policing, the 'rationally-choosing' criminal, and the importance of developing an active and responsible citizenship.

An award-winning historian and journalist tells the very human story of apartheid’s afterlife, tracing the fates of South African insurgents, collaborators, and the security police through the tale of the clandestine photo album used to target apartheid’s enemies. From the 1960s until the early 1990s, the South African security police and counterinsurgency units collected over 7,000 photographs of apartheid’s enemies. The political rogue’s gallery was known as the “terrorist album,” copies of which were distributed covertly to police stations throughout the country. With full access to one of these surviving albums, award-winning South African historian and journalist Jacob Dlamini investigates the story behind these images: their origins, how they were used, and the lives they changed. Extensive interviews with former targets and their family members testify to the brutal and often careless work of the police. Although the police certainly hunted down resisters, the terrorist album also contains mug shots of bystanders and even regime supporters. Their inclusion is a stark reminder that apartheid’s guardians were not the efficient, if morally compromised, law enforcers of legend but rather blundering agents of racial panic. **Police in Africa** - Jan Beek - 2017
State police forces in Africa are a curiously neglected subject of study, even within the study of security issues and African states. This book brings together important new work on the subject from a group of criminologists, anthropologists, sociologists, historians, political scientists and others, who have engaged with police forces and the publics with whom they interact across the continent to provide street-level perspectives from below and inside Africa's police forces. The collection is in three parts; first it considers historical trajectories and particular configurations of police power within wider political systems, then examines the "inside view" of police forces as state institutions - the challenges, preoccupations, professional ethics and self-perceptions of police officers, and finally looks at how African police officers go about their work, in terms of everyday practices and engagements with the public, and the meanings that are construed in the course of doing so. The studies span the continent from South Africa to Sierra Leone, and illustrate similarities and differences in Anglo-phone, Francophone and Lusophone states, post-socialist, post-military and post-conflict contexts, and amid both centralisation and devolution of policing powers, democratic transitions and new illiberal regimes, while keeping a strong ethnographic focus on ordinary police officers and police work at their core.

**Politics South Africa** - Heather Deegan - 2014-05-22

South Africa’s democratic transformation in 1994 captured the attention of the international community. Politics: South Africa provides an acute appraisal of the critical moments in the history of South Africa, and examines the political environment in the years following the shift to democracy. Under the leadership of the revered figure of Nelson Mandela, the ‘rainbow nation’ achieved the transition with less violence than had been feared. A new generation of post-Apartheid young people has grown up, and the socio-political environment is maturing. However, the country still has immense challenges to overcome, in delivering services to its diverse populations faced with the impact of HIV/AIDS on communities and the economic
Politics South Africa - Heather Deegan - second edition includes two entirely new chapters based on the author’s recent research and interviews within the country, dealing with the legacy of the President Mbeki years, the implications of the 2009 election, and the challenges now facing the country under Jacob Zuma. Politics: South Africa is an accessible guide for students, and a fascinating appraisal of a nation which has travelled a long journey but is still trying to reconcile its past. Features include:
- boxed discussions of key subject areas
- chronology of important events
- maps
- appendices of critical documents and speeches

Dr Heather Deegan is a Reader in Comparative Politics at Middlesex University, London. She was a Fellow of the Africa Institute of South Africa, Pretoria and was a Visiting Lecturer at the University of Witwatersrand. She is the author of six books including the recently published Africa Today: Culture, Economics, Religion, Security (2009).

An explanation of the New Growth Plan and alternatives to neo-liberal and capitalist development in South Africa. In this second volume of the New South African Review, the New Growth Path adopted by the South African government in 2010 provides the basis for a dialogue about whether 'decent work' is the best solution to South Africa's problems of low economic growth and high unemployment. There are investigations into rising inequality against the backdrop of the failings of Black Economic Empowerment; 'greening the economy', with emphasis on biofuels; the crisis of acid mine drainage on the Witwatersrand; possibilities for participatory forms of government; civil society
dialogue about whether 'decent work' is the best the SABC; the crisis in child care in public hospitals; the relationship between the police and a township community; the problems related to the absence of legislation to govern the powers of traditional authorities over land allocation; and assessments of the state of opposition political parties and the ANC Alliance. Asking whether the New Growth Plan reflects a set of new policies or an attempt to re-dress old (com)promises in new clothes, this volume brings together different voices in debate about possibilities for alternatives to neo-liberal and capitalist development in South Africa.

New South African Review 2 - Devan Pillay - 2011-10-01

An explanation of the New Growth Plan and alternatives to neo-liberal and capitalist development in South Africa In this second volume of the New South African Review, the New Growth Path adopted by the South African government in 2010 provides the basis for a solution to South Africa's problems of low economic growth and high unemployment. There are investigations into rising inequality against the backdrop of the failings of Black Economic Empowerment; 'greening the economy', with emphasis on biofuels; the crisis of acid mine drainage on the Witwatersrand; possibilities for participatory forms of government; civil society activism; transformation of the print media and the SABC; the crisis in child care in public hospitals; the relationship between the police and a township community; the problems related to the absence of legislation to govern the powers of traditional authorities over land allocation; and assessments of the state of opposition political parties and the ANC Alliance. Asking whether the New Growth Plan reflects a set of new policies or an attempt to re-dress old (com)promises in new clothes, this volume brings together different voices in debate about possibilities for alternatives to neo-liberal and
This book deals with the historic transition to democracy in South Africa and its impact upon crime and punishment. It examines how the problem of crime has emerged as a major issue to be governed in post-apartheid South Africa. Having undergone a dramatic transition from authoritarianism to democracy, from a white minority to black majority government, South Africa provides rich material on the role that political authority, and challenges to it, play in the construction of crime and criminality. As such, the study is about the socio-cultural and political significance of crime and punishment in the context of a change of regime. The work uses the South African case study to examine a question of wider interest, namely the politics of punishment and race in neoliberalizing regimes. It provides interesting and illuminating empirical material to the broader debate on crime control polities.

Exploring Police Integrity - Sanja Kutnjak Ivković - 2019-11-09
This work provides an innovative new look at police ethics, including results from an updated version of the classic Police Integrity Questionnaire, including new social and technological advances. It aims to push the study of police research further, expanding on and testing police integrity theory and methodology, the relationship between community and integrity, and the influence of multiculturalism and globalization on policing and community attitudes. This work brings together experienced scholars who have used the police integrity theory and the accompanying methodology to measure police integrity in eleven countries, and provide advance and sophisticated explorations of the topic. Organized into three thematic sections, it explores the testing methodology for community relations, and explores police subcultures. This innovative book will be of interest to researchers in criminology & criminal justice, particularly with an interest in policing, as well as related fields such as sociology, public policy, and comparative law.

**Enhancing Police Service Delivery** - James F. Albrecht - 2021
Contemporary police service delivery and performance are complex phenomena. Law enforcement, particularly at the local level, must therefore face the additional challenges of globalization, cybercrime, counter-terrorism and calls for reform, at a time when extreme budgetary constraints are being implemented. Policing operations encompass multiple critical tasks and responsibilities not routinely measured and evaluated, such as response to incidents involving medical assistance, homelessness, mental illness, community engagement, and neighborhood problem-solving endeavors. This volume aims to provide government, criminal justice and policing administrators, policy makers and criminal justice scholars and researchers with comprehensive analyses of the critical issues impacting the challenges inherent in providing effectual public safety, security and service, all from a global perspective. It takes into account popular criticism, extreme budgetary constraints, and the relatively novel cybercrime. The book merges study and practice to identify avenues to best serve community interests, ensure organizational success, and enhance public confidence in policing and in rule of law.

**Policing** - Rohit Choudhary - 2009-04-11

A first-of-its-kind, this book proposes a marketing plan for the police, using the conventional framework of marketing management. While there is considerable discussion and criticism of the way the police force functions in India, no comprehensive alternative model has been proposed to implement the New Police operations. In fact, the necessity for overhauling the police system is strongly felt all over the world in the light of the recent international security lapses. The framework that this book suggests comprises current situation analysis, SWOT analysis, STP analysis and the 8 Ps. Policing: Reinvention Strategies in a Marketing Framework combines marketing principles with the empirical knowledge of police operations to suggest improvements in the Indian police force. It uses the marketing motto of 'keeping the customer at the centre' as key to finding solutions to the issues that the police face in their everyday operations. In addition, it carries case studies related to police operations from across the world and suggests ways of adapting the strategies used in these to the Indian context. In doing so, the book offers valuable inputs for police academies, public administration, public policy, and state security commissions, as it not only analyses the current situation in the police

Sex work occupies a legally gray space in Johannesburg, South Africa, and police attitudes towards it are inconsistent and largely unregulated. As I. unregulated. As I. India Thusi argues in Policing Bodies, this results in both room for negotiation that can benefit sex workers and also extreme precarity in which the security police officers provide can be offered and taken away at a moment's notice. Sex work straddles the line between formal and informal. Attitudes about beauty and subjective value are manifest in formal tasks, including police activities, which are often conducted in a seemingly ad hoc manner. However, high-level organizational directives intended to regulate police obligations and duties toward sex workers also influence police action and tilt the exercise of discretion to the formal. In this liminal space, this book considers how sex work is policed and how it should be policed. Challenging discourses about sexuality and gender that inform its regulation, Thusi exposes the limitations of dominant feminist arguments regarding the legal treatment of sex work. This in-depth, historically informed ethnography illustrates the tension between enforcing a country's laws and protecting citizens' human rights.

Police Abuse in Contemporary Democracies -
Michelle D. Bonner - 2018-03-28
This volume offers a much-needed analysis of police abuse and its implications for our understanding of democracy. Sometimes referred to as police violence or police repression, police abuse occurs in all democracies. It is not an exception or a stage of democratization. It is, this volume argues, a structural and conceptual dimension of extant democracies. The book draws our attention to how including the study of policing into our analyses strengthens our understanding of democracy, including the persistence of hybrid democracy and the decline of democracy. To this end, the book examines three key dimensions of democracy: citizenship, accountability, and socioeconomic (in)equality. Drawing from political theory, comparative politics, and political economy, the book explores cases from France, the US, India, Argentina, and reveals how integrating police abuse can contribute to a more robust study of democracy and government in general.

**The Emergence of the South African Metropolis** - Vivian Bickford-Smith - 2016-05-16
Focusing on South Africa's three main cities - Johannesburg, Cape Town, and Durban - this book explores South African urban history from the late nineteenth century onwards. In particular, it examines the metropolitan perceptions and experiences of both black and white South Africans, as well as those of visitors, especially visitors from Britain and North America. Drawing on a rich array of city histories, travel writing, novels, films, newspapers, radio and television programs, and oral histories, Vivian Bickford-Smith focuses on the consequences of the depictions of the South African metropolis and the 'slums' they belonging and geography helped create and reinforce South African ethnicities and nationalisms. This ambitious and pioneering account, spanning more than a century, will be welcomed by scholars and students of African history, urban history, and historical geography.

The decolonization of Namibia was delayed from 1966 to 1989—the period of the war of independence—pitting the Namibian nationalists against the South African minority-ruled regime. This book describes the diplomatic, economic and military campaigns of the Namibian and South African belligerents and draws a comparison with several other decolonization wars. Using data from parliamentary debates, the aftermath is examined of the Namibian war and the newly independent nation. The book provides a basis for further investigation of the decolonization process.

The shift from apartheid to a constitutional democracy in South Africa brought with it a plethora of questions concerning ideas of nationhood, citizenship, and organisational transformation. Integrally caught up in the revolution, the South African Police Service (SAPS) faced transformative challenges on scales far larger than most other organisations in the country. From being the strong arm of the oppressive elite, it has had to restructure and rearticulate its function while simultaneously attempting to maintain law and order. Like many other corporations and organisations, the SAPS has engaged in interventions aimed at aiding the fluidity of this process. Andrew Faull's thesis is an analysis of one such intervention, focusing on SAPS members at one particular station. It attempts to ascertain the extent to which members are changing as a result of particular diversity workshops conducted in a region of the Western Cape. This work brings together an under-examined intersection of diversity and police cultural theory in South Africa, emphasizing the need for greater attention to

**Science and society in southern Africa** - Saul Dubow - 2017-03-01
This collection, dealing with case studies drawn from South Africa, Zimbabwe, Mozambique and Mauritius, examines the relationship between scientific claims and practices, and the exercise of colonial power. It challenges conventional reasoning with the capacity to confer benefits in a more or less even-handed manner. That science has the potential to further the collective good is not fundamentally at issue, but science can also be seen as complicit in processes of colonial domination. Not only did science assist in bolstering aspects of colonial power and exploitation, it also possessed a significant ideological component: it offered a means of legitimating colonial authority by counter-poising Western rationality to native superstition and it served to enhance the self-image of colonial or settler elites in important respects. This innovative volume ranges broadly through topics such as statistics, medicine, eugenics, agriculture, entomology and botany.
