5: Economic Methods of Valuation | Perspectives on
The discounting of future benefits and costs is a practice introduced from financial analysis to account for the productivity of capital. In recent years, some environmental economists have been swayed by critics who worry that discounting implies that the concerns of the future (perhaps only a few decades hence) count only trivially in the calculations of the present.

Rational planning model - Wikipedia
Modify future decisions and actions taken based on the above evaluation of outcomes. Discourse of rational planning model used in policy making. The rational model of decision-making is a process for making sound decisions in policy making in the public sector.
