preparedness for a nuclear detonation of up to 10 kilotons. This book provides a candid and sobering look at our current state of preparedness for an IND, and has been struggling for some time to address and plan for the threat of nuclear terrorism and other weapons of mass destruction that terrorists might obtain and use.

A nuclear attack on a large U.S. city by terrorists—even with a low-yield improvised nuclear device (IND) of 10 kilotons or less—would cause a large number of deaths.
