Youth Employment and Skills Development in The Gambia - Richard Johanson - 2011-07-08
"This report was prepared by Nathalie Lahire and included the following team members: Priscilla Elms, Ryoko Wilcox, and Richard Johanson."
"This publication is one of a series of analytical Reports issued by the Population and Social Development Section of the Social Development Division at the Economic and Social Commission for Western Asia (ESCWA). It aims to deepen knowledge of the interrelation between population and development issues. The fourth edition of this Report is issued as one of the work programme activities of the Population and Social Development Section. These activities stress the importance to treat youth as a distinct sociodemographic group that needs to be targeted by specific national policies."--Publisher's description.

Youth Employment and Joblessness in Advanced Countries - David G. Blanchflower - 2007-12-01
The economic status of young people has declined significantly over the past two decades, despite a variety of programs designed to aid new workers in the transition from the classroom to the job.
The economic status of young people has declined significantly over the past two decades, despite a variety of programs designed to aid new workers in the transition from the classroom to the job market. This ongoing problem has proved difficult to explain. Drawing on comparative data from Canada, Germany, France, Sweden, and the United Kingdom, these papers go beyond examining only employment and wages and explore the effects of family background, education and training, social expectations, and crime on youth employment. This volume brings together key studies, providing detailed analyses of the difficult economic situation plaguing young workers. Why have demographic changes and additional schooling failed to resolve youth unemployment? How effective have those economic policies been which aimed to improve the labor skills and marketability of young people? And how have youths themselves responded to the deteriorating job market confronting them? These questions form the empirical and organizational bases upon which these studies are founded.
examines the synergies between technologies and youth social entrepreneurship. Policy guidance is offered to enable ecosystems for young social entrepreneurs.

**World Youth Report**
United Nations - 2020-09-17
This report highlights how youth social entrepreneurship can support young people's employment and development while helping to accelerate the implementation of the SDGs. It presents social entrepreneurship and anchors it in the context of the 2030 Agenda. It examines how social entrepreneurship of young people can offer not only employment opportunities, but also support other elements of youth development such as their participation. It assesses challenges to young people's social entrepreneurship and examines the synergies between technologies and youth social entrepreneurship. Policy guidance is offered to enable ecosystems for young social entrepreneurs.

*Community Programs to Promote Youth Development* - Institute of Medicine - 2002-02-12

After-school programs, scout groups, community service activities, religious youth groups, and other community-based activities have long been thought to play a key role in the lives of adolescents. But what do we know about the role of such programs for today's adolescents? How can we ensure that programs are designed to successfully meet young people's developmental needs and help them become healthy, happy, and productive adults? *Community Programs to Promote Youth Development* explores these questions, focusing on essential elements of adolescent well-being and healthy development. It offers practice, and research to ensure that programs are well designed to meet young people's developmental needs. The book also discusses the features of programs that can contribute to a successful transition from adolescence to adulthood. It examines what we know about the current landscape of youth development programs for America's youth, as well as how these programs are meeting their diverse needs. Recognizing the importance of adolescence as a period of transition to adulthood, *Community Programs to Promote Youth Development* offers authoritative guidance to policy makers, practitioners, researchers, and other key stakeholders on the role of youth development programs to promote the healthy development and well-being of the nation's youth.

**Rethinking Youth** - Rob White - 2020-08-06
Young people grow up in varied circumstances with
to the complexities of youth, perspectives. While youth does not exist as a single group we need to understand what is happening in young people's lives. Rethinking Youth challenges the conventional wisdoms surrounding the position and opportunities of young people today and provides a systematic overview of the major perspectives in youth studies. The authors demonstrate how the concept of youth involves a tension between the social significance of age, which gives young people a common status, and the significance of social divisions. Drawing upon studies from different societies, they examine debates surrounding youth and economy, youth development, youth subcultures, youth transitions and youth marginalisation. Rethinking Youth offers a provocative critique of mainstream conceptions of youth, the programs and strategies designed for 'at risk' young people, and policy development in youth affairs. It calls for greater sensitivity and greater emphasis on democracy and equality in dealing with the problems experienced by young people in a rapidly changing world.

Johanna Wyn is Director of the Youth Research Centre at the University of Melbourne. Rob White lectures in Criminology at the University of Melbourne.

**Attitudes, Aptitudes, and Aspirations of American Youth** - National Research Council - 2003-02-01
Recruiting an all-volunteer military is a formidable task. To successfully enlist one eligible recruit, the Army must contact approximately 120 young people. The National Research Council explores the various factors that will determine whether the military can realistically expect to recruit an adequate fighting force-one that will meet its upcoming needs. It also assesses the military's expected manpower needs and projects the numbers of
Attitudes, Aptitudes, and Aspirations of American Youth offers an overview of important issues for military recruiters, touching on a number of important topics including: sex and race, education and aptitude, physical and moral attributes, and military life and working conditions. In addition, the book looks at how a potential recruit would approach the decision to enlist, considering personal, family, and social values, and the options for other employment or college. Building on the need to increase young Americans' propensity to enlist, this book offers useful recommendations for increasing educational opportunities while in the service and for developing advertising strategies that include concepts of patriotism and duty to country. Of primary value to military policymakers, recruitment officers, and analysts, Aspirations of American Youth will also interest social scientists and policy makers interested in youth trends.

Youth Employment Programs in Ghana - World Bank - 2020-10-31
Unemployment and underemployment are global development challenges. The situation in Ghana is no different. In 2016, it was projected that, given the growing youth population, 300,000 new jobs would need to be created each year to absorb the increasing numbers of unemployed young people. Yet the structure of the Ghanaian...
structure is improved. Employment has not changed much from several decades ago. Most jobs are low skill, requiring limited cognitive or technology know-how, reflected by low earnings and less decent work. An additional challenge for Ghana is the need to create access to an adequate number of high-quality, productive jobs. This report seeks to increase knowledge about Ghana's job landscape and youth employment programs to assist policy makers and key stakeholders to identify ways to improve the programming and effectiveness of youth employment programs and to strengthen coordination among major stakeholders. Focused, strategic, short-to-medium and long-term responses are required to address the current unemployment and underemployment challenges. Effective coordination and synergies among youth employment programs are needed to avoid duplication of efforts while transformation of the country's economic

Effective private sector participation in skills development and employment programs is suggested. The report posits interventions in five priority areas, which are not new but could potentially be impactful through scaling up. These areas include: (1) agriculture and agribusiness promotion; (2) apprenticeship (skills training); (3) entrepreneurship promotion; (4) high-yielding areas (renewable energy-solar, construction, tourism, sports, and green jobs); and (5) pre-employment support services. Finally, with the fast-changing nature of work due to technology and artificial intelligence, Ghana needs to develop an education and training system that is versatile and helps young people to adapt and thrive in the 21st century world of work.

the 21st century world of work.

Children, Youth, and Development - Nicola Ansell - 2005
Children constitute a large part of the population of developing countries. This text considers issues such as education, child labour, street children, child soldiers, refugees, child slaves, and the impact of environmental change and hazards on children.

The Future of Rural Youth in Developing Countries Tapping the Potential of Local Value Chains - OECD - 2018-05-30
Rural youth constitute over half of the youth population in developing countries and will continue to increase in the next 35 years. Without rural transformation and green industrialisation happening fast enough to create more wage employment in a sustainable manner, the vast majority of rural children.

Investing in the Health and Well-Being of Young Adults - National Research Council - 2015-01-27
Young adulthood - ages approximately 18 to 26 - is a
productive and equitable with long-lasting implications for a person's economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the popular media in recent years, young adults are too rarely treated as a distinct population in policy, programs, and research. Instead, they are often grouped with adolescents or, more often, with all adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. Investing in The Health and Well-Being of Young Adults describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. Investing in The Health and Well-Being of Young Adults makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high-demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes

Youth and Employment in Sub-Saharan Africa - Hiroyuki Hino - 2014-06-05
It is widely acknowledged that youth unemployment is one of the most critical challenges facing countries in Sub-Saharan Africa. This volume brings together an eminent group of international scholars to analyse the extent and complex nature of this joblessness, and offer a set of evidence-based policy choices that could contribute to solving the problem in the short- and long-run. Part I reviews the existing literature on youth unemployment and underemployment in Sub-Saharan Africa from microeconomic and macroeconomic perspectives, while Part II goes on to present detailed country studies of Ethiopia, Ghana, Kenya and South Africa. These studies offer a deep understanding of the situation on the ground and consider country-specific solutions. Throughout the book it is argued that the standard ILO definition of unemployment is too narrow to correctly portray employment situations in Sub-Saharan Africa. Several alternative measures of unemployment are presented, which show that joblessness is far more pervasive than commonly assumed in the literature. This volume will be of interest to academics and policy makers involved in African development.
and Institute of Medicine - Africa. Several alternative measures of unemployment are presented, which show that joblessness is far more pervasive than commonly assumed in the literature. This volume will be of interest to academics and policy makers involved in African development.

Protecting Youth at Work - National Research Council

1998-11-18
In Massachusetts, a 12-year-old girl delivering newspapers is killed when a car strikes her bicycle. In Los Angeles, a 14-year-old boy repeatedly falls asleep in class, exhausted from his evening job. Although children and adolescents may benefit from working, there may also be negative social effects and sometimes danger in their jobs. Protecting Youth at Work looks at what is known about work done by children and adolescents and the effects of that work on their physical and emotional health and social functioning. The committee recommends specific initiatives for legislators, regulators, researchers, and employers. This book provides historical perspective on working children and adolescents in America and explores the framework of child labor laws that govern that work. The committee presents a wide range of data and analysis on the scope of youth employment, factors that put children and adolescents at risk, and the consequences of working for children and adolescents. It also examines various solutions that could help ensure that children and adolescents work safely and productively.
committee recommends positive and negative effects of employment, including data on educational attainment and lifestyle choices. Protecting Youth at Work also includes discussions of special issues for minority and disadvantaged youth, young workers in agriculture, and children who work in family-owned businesses.

The specific initiatives for legislators, regulators, researchers, and employers. This book provides historical perspective on working children and adolescents in America and explores the framework of child labor laws that govern that work. The committee presents a wide range of data and analysis on the scope of youth employment, factors that put children and adolescents at risk in the workplace, and the positive and negative effects of employment, including data on educational attainment and lifestyle choices. Protecting Youth at Work also includes discussions of special issues for minority and disadvantaged youth, young workers in agriculture, and children who work in family-owned businesses.

**The Promise of Adolescence**
National Academies of Sciences, Engineering, and Medicine - 2019-07-26
Adolescence begins with the onset of puberty and ending in the mid-20s.
inequalities in opportunity, during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, and to explore one's developing identity. It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course. Because adolescents comprise nearly one-fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescence rather than focusing myopically on containing its risks. This report examines the neurobiological and socio-behavioral science of adolescent development and outlines how this knowledge can be applied, both to promote adolescent well-being, resilience, and development, and to rectify structural barriers and enabling all adolescents to flourish.

The Promise of Adolescence - National Academies of Sciences, Engineering, and Medicine - 2019-07-26
Adolescence, beginning with the onset of puberty and ending in the mid-20s, is a critical period of development during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, and to explore one's developing identity. It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course. Because adolescents comprise nearly one-fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescence rather than

Youth Employment in Bangladesh - Fahmida Khatun - 2019-12-26
This book brings together pioneering and evidence-based research that focuses on youth employment—one of the foremost development
This book brings together pioneering and evidence-based research that focuses on youth employment—one of the foremost development challenges of our time—and fills a critical research and knowledge gap alongside consolidating existing relevant literature. Comprehensive in scope, the book provides an overview of trends in youth employment in Bangladesh, empirically analyses the determinants of youth unemployment, covers relevant economic theory, and recommends policy measures for employment creation in Bangladesh. The new evidence from Bangladesh on the aforesaid issues will inform relevant and concurrent policy discourse, add value to related research in the field, and inspire future research. The insights gathered through this study will serve as an important lesson for other developing countries on what works and what does not in policy-making.
