**Red Stamps and Gold Stars**

Acknowledgments of politically sensitive border regions, to helping informants-turned-friends access appropriate health care, to reflections on how to best represent ethnic minority voices. The volume's contributors — accomplished geographers, anthropologists, and ethnohistorians — foreground the importance of questioning one's subjective gaze and of debating representations of "the other."

**Western Naturalistic Notions of Human-Environment Relations**

This study offers a fresh reading of religious conversion by analyzing a variety of "missionaries" that sought to influence the Montagnard-Dega refugee. Thomas Pearson uses ethnographic and archival research to tell the story of cross-cultural conversion through a Montagnard's eyes and through the eyes of missionaries of different worldviews and religious traditions. This study demonstrates how religious conversion is a complex process that involves not only religious beliefs but also cultural, political, and social factors. It also highlights the importance of understanding the perspectives of both missionaries and converts.

**Defend and Befriend**

This volume provides an overview of key themes in Indigenous Environmental Knowledge (IEK) and anchors them with brief but well-grounded empirical case studies of relevance for each of these themes, drawn from bioculturally diverse areas. It demonstrates how Indigenous knowledge systems are an important resource for solving environmental challenges and that they should be recognized and supported. It also highlights the importance of collaboration and partnership between Indigenous communities and scientists, and the need for cross-cultural understanding.

On The Borders of State Power - Martin Gainsborough - 2008-10-31

On The Borders of State Power explores the changing nature, meaning and significance of international borders over time in the area referred to today as the Greater Mekong Sub-region, incorporating Burma, Cambodia, Laos, Thailand.

The book is divided into six sections. The first three chapters compare the changing nature of borders in each country, using examples from the 15th to 21st centuries, and demonstrate that borders are not static phenomena, but are subject to constant change and modification. The final three sections explore the changing nature of borders over time, using examples from the 15th to 21st centuries and engage with contemporary literature on globalisation, particularly as they affect borders and the nature of state power. The book argues that there is a great deal of diversity in terms of the importance of borders over time, but that all borders are constantly being redefined. Thus, borders commonly thought to be closed are often more open, open borders are found to be more restricted, while pre-colonial frontiers, which are usually viewed as relatively unimportant compared with the colonial era, are in fact found to have been more closely governed. The book shows how economic liberalisation – or so-called cooperation between the Mekong states in the post-Cold War period – has been accompanied not by the retreat of the state but rather by its expansion, including in ways which frequently impose greater restrictions on the poor and marginalised. Incorporating work by both historians and social scientists, this book is a valuable read for those interested in the politics, development and geography of Southeast Asia.

The A to Z of the Vietnam War - Edwin E. Moïse - 2005-07-21

There is a need to see things more clearly, but without simplifying what was inherently a very complex war, which engulfed not only the United States and Vietnam, but their respective allies and other countries in Indochina, namely Laos and Cambodia. This task is undertaken by The A to Z Guide of the Vietnam War, first in its chronology, then in its introduction, but mainly in a substantial dictionary section including hundreds of entries on significant military and political persons, places, events, armed units, battles and lesser engagements, and weapons. Those seeking further information can then turn to the bibliography.

Frontier Livelihoods - Sarah Turner - 2015-06-08

Do ethnic minorities have the power to alter the course of their fortune when living within a socialist state? In Frontier Livelihoods, the authors focus their study on the Hmong - known in China as the Miao - in the Sino-Vietnamese borderlands, contending that individuals and households create livelihoods that are often governed by state policies. This book is a valuable read for those interested in the politics, development and geography of Southeast Asia.
