Examination Review for Ultrasound Steven M. Penny 2010-03 This text is a narrative style exam review text for two of the most popular sonography certification exams in abdomen and obstetrics and gynecology by the ARDMS (American Registry of Diagnostic Medical Sonography) and ARRT (American Registry of Radiologic Technologists) certification granting bodies. This resource is ideal for ultrasound programs requiring a certification review manual for either a review course or for use throughout the curriculum, as well as any professional preparing for certification. Questions and answers are included within the text. A companion website offers an online exam simulation, customizable for both ARDMS and ARRT exam formats.

Sonography Scanning - E-Book Betty Bates Tempkin 2014-11-14 Commonly referred to as the "sonography bible" by many of its past and current users, Betty Tempkin’s Sonography Scanning, 4th Edition is the go-to guide for producing diagnostic sonograms for physicians. Featuring an updated two-color design, this new edition covers the latest ultrasound scanning principles along with step-by-step instructions for scanning and documenting images. The text also incorporates clinical skills, professionalism, image labeling, image techniques, case presentations, handling of ultrasound equipment, and the universal method for scanning and documenting pathologies. The scanning protocols follow AIUM guidelines.
and provide information on patient prep, transducers, breathing techniques, comprehensive surveys, and required images. Also included are the location of specific vessels or organs, anatomy and physiology, sonographic appearance, and normal variations. "Overall, this book is an excellent resource for novice sonography students, but also provides a useful reference book for the more experienced sonographer." Reviewed by: Dr Vivien Gibbs on behalf of RAD Magazine Date: July 2015

Scanning principles and step-by-step instructions on how to scan and document images help users establish standardization and image documentation for physician diagnostic interpretation. Scanning protocols that follow AIUM guidelines provides the essential information on patient prep, transducers, breathing techniques, comprehensive surveys, and required images. The location of specific vessels or organs, anatomy and physiology, sonographic appearance, and normal variations are also included. Sonographic ergonomics and proper use of equipment help sonographers avoid occupational injuries. Scanning protocol for pathology provides the criteria for evaluating and documenting abnormal sonographic findings, describing those findings within legal parameters, and relating those findings to the interpreting physician. Review questions at the end of each chapter give users the ability to self-review.

NEW! Transducer location drawings included on images helps users understand exactly where on the body they should scan to produce a particular image.

NEW! Musculoskeletal chapter provides musculoskeletal coverage for those sonographers interested in this specialty.

NEW! Two-color streamlined design enhances readability and allows for more...

*Visitor Management* Myra Shackley 2009-11-03
'Visitor Management' is an innovative collection of case studies taken from cultural World Heritage Sites. Using examples from the world's most significant archaeological and architectural legacies this book identifies the problems involved with site management. Cultural World Heritage Sites are extremely attractive to contemporary visitors. This poses many problems for site management, notably the need to preserve a delicate balance between interpretation, conservation and the provision of visitor facilities. This contributed title takes examples from a range of UNESCO World Heritage Sites and shows models of good practice looking at the functions of the different organizations involved and the range of variation among sites. The contributors have international expertise and draw on first-hand knowledge at a practical level. 'Visitor Management: Case studies from World Heritage Sites' is ideal for practitioners and students involved
in heritage management and conservation management. Undergraduate and postgraduate students in tourism, leisure and hospitality will also find this book an invaluable read. Myra Shackley is Professor of Culture Resource Management and Head of the Centre for Tourism and Visitor Management at Nottingham Trent University. Her research interests lie in the management of cultural and wildlife tourism, particularly in relation to Protected Areas and World Heritage Sites. She has published eleven previous books, of which the last was 'Wildlife Tourism' (International Thompson Business Press, 1996) and has extensive research and consultancy interests within the field of visitor management.

Cultural Tourism in a Changing World
Melanie Kay Smith 2006-09-12 At the interface between culture and tourism lies a series of deep and challenging issues relating to how we deal with issues of political engagement, social justice, economic change, belonging, identity and meaning. This book introduces researchers, students and practitioners to a range of interesting and complex debates regarding the political and social implications of cultural tourism in a changing world. Concise and thematic theoretical sections provide the framework for a range of case studies, which contextualise and exemplify the issues raised. The book focuses on both traditional and popular culture, and explores some of the tensions between cultural preservation and social transformation. The book is divided into thematic sections - Politics and Policy; Community Participation and Empowerment; Authenticity and Commodification; and Interpretation and Representation - and will be of interest to all who wish to understand how cultural
tourism continues to evolve as a focal point for understanding a changing world.
