The Last Empire - Stefan Kanfer - 1995-04-30
"Timely corporate history--as exciting and poignant as any good tale of derring-do against great odds by all-too-flawed giants. " - Kirkus Reviews With a scholar's precision and a novelist's eye, Stefan Kanfer tells the inside story of De Beers Consolidated Mines - from the nineteenth century diamond rush that transformed Johannes De Beer's humble South African farm into an exotic klondike, to the Oppenheimers' shadow empire that has achieved unmatched global reach.

Lusaka: The New Capital of Northern Rhodesia - Robert Home - 2013-07-24
This short account of the planning of Lusaka as the new capital of Northern Rhodesia, written for its official opening in 1935 as part of jubilee

prestige project for British indirect rule limited edition specifically for that event, and is now very scarce and difficult to obtain, but deserves to be made more widely available for scholars of planning and urban history, and especially all interested in African urban development. The planning of Lusaka was a prestige project for British indirect rule administration in Africa during the 1930s, in the recovery from the Great Depression, and was claimed as an example of British garden city and town planning expertise being applied overseas to its imperial territorial acquisitions. Particular features of Lusaka's planning were the attention to public buildings, echoing on a smaller scale the grand imperial designs of Baker and Lutyens in South Africa and India, the importance attached to landscaping and tree planting, and the priority given to the new airport reflecting the great expansion of air networks during the 1930s. The historical context also includes Lusaka's place on the projected 'Cape to Cairo' railway, and its importance as a colonial project at a time of rapid development by American and South African capitalism of copper mining in the Copperbelt. Town planning was seen in the Colonial Office as an important tool of colonial management, and successive colonial governors in Northern Rhodesia were associated with planning initiatives elsewhere. Lusaka capital city was seen as a demonstration project which influenced negotiations over planning the new Copperbelt mining townships. Lusaka's colonial origins are of increasing interest to present-day planners in Zambia, concerned with problems of rapid urbanisation and the recent recovery of the copper mining industry; it is also of wider interest for both its place in the history of town planning and garden city concepts beyond Europe and as a planned new capital in the Third World.

Lusaka: The New Capital of Northern Rhodesia - Robert Home - 2013-07-24

This short account of the planning of Lusaka as the new capital of Northern Rhodesia, written for its official opening in 1935 as part of jubilee celebrations for King George V, was printed in a limited edition specifically for that event, and is now very scarce and difficult to obtain, but deserves to be made more widely available for scholars of planning and urban history, and especially all interested in African urban development. The planning of Lusaka was a

administration in Africa during the 1930s, in the recovery from the Great Depression, and was claimed as an example of British garden city and town planning expertise being applied overseas to its imperial territorial acquisitions. Particular features of Lusaka's planning were the attention to public buildings, echoing on a smaller scale the grand imperial designs of Baker and Lutyens in South Africa and India, the importance attached to landscaping and tree planting, and the priority given to the new airport reflecting the great expansion of air networks during the 1930s. The historical context also includes Lusaka's place on the projected 'Cape to Cairo' railway, and its importance as a colonial project at a time of rapid development by American and South African capitalism of copper mining in the Copperbelt. Brotherhood of the Bomb - Gregg Herken - 2013-08-13

The fascinating story of the men who founded the nuclear age, fully told for the first time The story of the twentieth century is largely the story of the power of science and technology. Within that

Hong Kong to China at the end of the twentieth, between Robert Oppenheimer, Ernest Lawrence, and Edward Teller-the scientists most responsible for the advent of weapons of mass destruction. How did science-and its practitioners-enlisted in the service of the state during the Second World War, become a slave to its patron during the Cold War? The story of these three men, builders of the bombs, is fundamentally about loyalty-to country, to science, and to each other-and about the wrenching choices that had to be made when these allegiances came into conflict. Gregg Herken gives us the behind-the-scenes account based upon a decade of research, interviews, and newly released Freedom of Information Act and Russian documents. Brotherhood of the Bomb is a vital slice of American history told authoritatively-and grippingly-for the first time.

Brotherhood of the Bomb - Gregg Herken - 2013-08-13

The fascinating story of the men who founded the nuclear age, fully told for the first time The story of the twentieth century is largely the story of the power of science and technology. Within that story is the incredible tale of the human conflict between Robert Oppenheimer, Ernest Lawrence, and Edward Teller-the scientists most responsible for the advent of weapons of mass destruction. How did science-and its practitioners-enlisted in the service of the state during the Second World War, become a slave to its patron during the Cold War? The story of these three men, builders of the bombs, is fundamentally about loyalty-to country, to science, and to each other-and about the wrenching choices that had to be made when these allegiances came into conflict. Brotherhood of the Bomb is a vital slice of American history told authoritatively-and grippingly-for the first time.

The Oxford History of the British Empire: Volume V: Historiography - Robin Winks - 1999-10-21

The Oxford History of the British Empire is a major new assessment of the Empire in the light of recent scholarship and the progressive opening of historical records. From the founding of colonies in North America and the West Indies in the seventeenth century to the reversion of

British imperialism was a catalyst for far-reaching change. The Oxford History of the British Empire as a comprehensive study helps us to understand the end of Empire in relation to its beginning, the meaning of British imperialism for the ruled as well as for the rulers, and the significance of the British Empire as a theme in world history. This fifth and final volume shows how opinions have changed dramatically over the generations about the nature, role, and value of imperialism generally, and the British Empire more specifically. The distinguished team of contributors discuss the many and diverse elements which have influenced writings on the Empire: the pressure of current events, access to primary sources, the creation of relevant university chairs, the rise of nationalism in former colonies, decolonization, and the Cold War. They demonstrate how the study of empire has evolved from a narrow focus on constitutional issues to a wide-ranging enquiry about international relations, the uses of power, and impacts and counterimpacts between settler groups and native peoples. The result is a thought-provoking cultural and intellectual inquiry into how we understand the past, and whether this understanding might affect the way we behave in the future.

Glitter & Greed - Janine Farrell-Robert - 2007-04-01

Rare, romantic, and forever: The diamond industry depends on these myths to reap billions of dollars of profit. This sensational investigation explodes such fallacies and reveals how multimillion-dollar advertising campaigns create the impression of rarity and romance. It reveals a very secret and unromantic world, one that is dominated and controlled by a handful of mighty corporations. With Leonardo DiCaprio's movie *The Blood Diamond* making more people than ever aware of the seamy side of the diamond trade, Janine Roberts' explosive exposé, taking us through seven decades of intrigue and manipulation, is the right book at the right time.

In Good Company - Dinah Rajak - 2011-11-09

Under the banner of corporate social responsibility (CSR), corporations have become increasingly important players in international development. These days, CSR's union of economics and ethics is virtually unquestioned as an antidote to harsh neoliberal reforms and the delinquency of the state, but nothing is straightforward about this apparently win-win formula. Chronicling transnational mining corporation Anglo American's pursuit of CSR, *In Good Company* explores what lies behind the movement's marriage of moral imperative and market discipline. From the company's global headquarters to its mineshafts in South Africa, Rajak reveals how CSR enables the corporation to accumulate and exercise power. Interested in CSR's vision of social improvement, Rajak highlights the dependency that the practice generates. This close examination of Africa's largest private sector employer not only brings critical attention to the dangers of corporate dominance, but also provides a lens through which to reflect on the wider global CSR movement.

Mining in World History - Martin Lynch - 2003
This book deals with the history of mining and smelting from the Renaissance to the present. Martin Lynch opens with the invention, sometime before 1453, of a revolutionary technique for separating silver from copper. It was this invention which brought back to life the rich copper-silver mines of central Europe, in the process making brass cannon and silver coin available to the ambitious Habsburg emperors, thereby underpinning their quest for European domination. Lynch also discusses the Industrial Revolution and the far-reaching changes to mining and smelting brought about by the steam engine; the era of the gold rushes; the massive mineral developments and technological leaps forward which took place in the USA and South Africa at the end of the 19th century; and, finally, the spread of mass metal-production techniques amid the violent struggles of the 20th century. In an engaging, concise and fast-paced text, he presents the interplay of personalities, politics and technology that have shaped the metallurgical industries over the last 500 years.

Diamond Stories - Renée Rose Shield - 2018-07-05
Sequestered within the heart of a cosmopolitan city is an exotic world—a place where diamonds, astronomically priced, are bought and sold on the strength of a handshake, and business disputes are resolved according to ancient Jewish principles of arbitration. Yet it is also a modern industry facing the same fundamental global changes affecting all businesses today. In *Diamond Stories*, Renée Rose Shield leads us into the unexamined realm of wholesale diamond traders in New York. Related to several well-respected traders, she had unprecedented access to a society normally closed to outside inquiry.

done by women, chronicles the resilient system and her anthropological training to provide an insightful exploration of this tradition-bound industry, the new challenges it faces, and the ways both industry and individuals adapt to and endure change. Shield begins with a fascinating history of diamond mining, combining the story of the De Beers cartel, the role of Jews in the trade, and the part diamonds have played both in war and liberation. Throughout, she incorporates commentary by current diamond traders. Succeeding chapters explore the evolving nature of both the global trade and the New York diamond district. Shield takes a close look at the increasingly complex ethnic makeup of the district, illuminates the rarely documented work done by women, chronicles the resilient system of arbitration, and reveals the ways in which many traders work well into their eighties and nineties. Their long lives of work, cushioned by the trade's social environment, offer hints for successful aging in general.

Mining Tycoons in the Age of Empire,

1870-1945 - Raymond E. Dumett - 2016-12-05

The years of the late nineteenth and early twentieth centuries, aptly described by Mark Twain as the 'Gilded Age' witnessed an unprecedented level of technological change, material excess, untrammled pursuit of profit and imperial expansion. Within this dynamic and often ruthless environment many colorful characters strode across the world stage, among them the great mining tycoons, who with the thousands of prospectors, diggers, shift bosses, timbermen, 'blastmen' and 'muckers' in mining enterprise constituted one of the major spearheads of global capitalistic expansion and colonial exploitation. This volume, which carries the epic story to the mid-twentieth century provides a truly international perspective on the role of mining entrepreneurs, investors and engineers in shaping the economic and political map of the globe, in testing management techniques and in setting a vogue for extravagant displays of wealth among the world's rich. Each chapter is loosely focussed on a biographical account of a particular mining tycoon that allows for broad and comparative accounts to be made about the individuals, their business interests, the technologies they employed and the national and international political considerations under which they operated. Furthermore, this structure also allows for consideration of the effect that these tycoons had on the countries and territories in which they worked, particularly the often long-lasting impact on indigenous populations, the environment, transport links and economic development. By approaching the subject matter through this stimulating mix of cultural, social, economic, business and colonial history, many intriguing and thought provoking conclusions are reached that will reward any scholars with an interest late nineteenth and early twentieth century history.

Mining Tycoons in the Age of Empire,

new editors, new authors, new topics and newly commissioned articles with a handful of classic articles * The first Encyclopedia to exploit the multimedia potential of linguistics through the online edition * Ground-breaking and International in scope and approach * Alphabetically arranged with extensive cross-referencing * Available in print and online, priced separately. The online version will include updates as subjects develop ELL2 includes: * c. 7,500,000 words * c. 11,000 pages * c. 3,000 articles * c. 1,500 figures: 130 halftones and 150 colour * Supplementary audio, video and text files online * c. 3,500 glossary definitions * c. 39,000 references * Extensive list of commonly used abbreviations * List of languages of the world (including information on no. of speakers, language family, etc.) * Approximately 700 biographical entries (now includes contemporary linguists) * 200 language maps in print and online Also available online via ScienceDirect - featuring extensive browsing, searching, and internal cross-referencing between articles in the work, plus dynamic linking to journal articles and abstract databases, making navigation flexible and easy. presence, is discussed as a social history where the presence of other nations - particularly Angola, Mozambique, Namibia, and Zimbabwe - looms large.

Diamonds and War - David De Vries - 2010-04-01

The mining of diamonds, their trading mechanisms, their financial institutions, and, not least, their cultural expressions as luxury items have engaged the work of historians, economists, social scientists, and international relations experts. Based on previously unexamined historical documents found in archives in Belgium, England, Israel, the Netherlands, and the United States, this book is the first in English to tell the story of the formation of one of the world's main strongholds of diamond production and trade in Palestine during the 1930s and 1940s. The history of the diamond-cutting industry, characterized by a long-standing Jewish presence, is discussed as a social history embedded in the international political economy of its times; the genesis of the industry in Palestine is placed on a broad continuum within the geographic and economic dislocations of Dutch, Belgian, and German diamond-cutting centers. In providing a micro-historical and interdisciplinary perspective, the story of the diamond industry in Mandate Palestine proposes a more nuanced picture of the uncritical approach to the strict boundaries of ethnic-based occupational communities. This book unravels the Middle-eastern pattern of state intervention in the empowerment of private capital and recasts this craft culture's inseparability from international politics during a period of war and transformation of empire.

African Identity in Post-Apartheid Public Architecture - Jonathan Alfred Noble - 2016-12-05

Since the end of Apartheid, there has been a new orientation in South African art and design, turning away from the colonial aesthetics to new types of African expression. This book examines some of the fascinating and impressive works of contemporary public architecture that 'concretise' imaginative dialogues with African landscapes, craft and indigenous traditions. Referring to Frantz Fanon's classic study of colonised subjectivity, 'Black Skin, White Masks', Noble contends that Fanon's metaphors of mask and skin are suggestive for architectural criticism, in the context of post-Apartheid public design. Taking South Africa's first democratic election of 1994 as its starting point, the book focuses on projects that were won in

are conceived within ideological debates and studying them allows for an examination of the interrelationships between architecture, politics and culture. The book offers insights into these debates through interviews with key parties concerned - architects, competition jurors, politicians, council and city officials, artists and crafters, as well as people who are involved in the day-to-day life of the buildings in question.

An important and stylish contribution to a fascinating area of research.

The Cradle of Language - Rudolf Botha - 2009-04-30

This book is the first to focus on the African origins of human language. It explores the origins of language and culture 250,000-150,000 years ago when modern humans evolved in Africa. Scholars from around the world address the fossil, genetic, and archaeological evidence and critically examine the ways it has been interpreted. The book also considers parallel developments among Europe's Neanderthals and the contrasting outcomes for the two species. Following an extensive introduction contextualizing and linking the book's topics and approaches, fifteen chapters bring together many of the most significant recent findings and developments in modern human origins research. The fields represented by the authors include genetics, biology, behavioural ecology, linguistics, archaeology, cognitive science, and anthropology.

Whole Brain® Learning in Higher Education

- Ann-Louise de Boer - 2013-10-15

Facilitating of learning in higher education can

learning. Whole Brain® Learning in Higher Education argues that facilitating learning in Higher Education should undergo transformation in order to develop the full academic potential of all stakeholders following the principles of action research. Empirical data was collected from participants in a number of projects across diverse disciplines. Participants included students, academic staff, instructional designers, and professionals attending short courses at tertiary level. A number of case studies are discussed as evidence for the value of the proposed model for higher education. This title consists of seven chapters, covering: the theoretical framework, baseline study, professional development, studies in Whole Brain® application, learning material that makes a difference, multidisciplinary collaboration, and the way forward. Defines Whole Brain® learning Explains the rationale behind Whole Brain® learning Demonstrates how the model can be applied in facilitating Whole Brain® learning in order to develop the full academic potential of students

brings to life the hopes that rural southerners
1982

The Diamond Invention - Edward Jay Epstein -
1982

A New South Rebellion - Karin A. Shapiro -
2017-11-01

In 1891, thousands of Tennessee miners rose up against the use of convict labor by the state's coal companies, eventually engulfing five mountain communities in a rebellion against government authority. Propelled by the insurgent sensibilities of Populism and Gilded Age unionism, the miners initially sought to abolish the convict lease system through legal challenges and legislative lobbying. When nonviolent tactics failed to achieve reform, the predominantly white miners repeatedly seized control of the stockades and expelled the mostly black convicts from the mining districts. Insurrection hastened the demise of convict leasing in Tennessee, though at the cost of greatly weakening organized labor in the state's coal regions. Exhaustively researched and vividly written, *A New South Rebellion* brings to life the hopes that rural southerners invested in industrialization and the political tensions that could result when their aspirations were not met. Karin Shapiro skillfully analyzes the place of convict labor in southern economic development, the contested meanings of citizenship in late-nineteenth-century America, the weaknesses of Populist-era reform politics, and the fluidity of race relations during the early years of Jim Crow.

Deep Blue - Sylvie Shaw - 2014-12-05

Nature religions look to rivers, lakes and oceans for inspiration and spiritual transformation. 'Deep Blue' brings together the work of influential scholars in the field of nature religion, ranging across anthropology, mythology, sociology and psychology. The essays examine the interrelationship between spiritual practice, critical thinking, and environmental concern. Tracing the ancient history of humanity's close relationship with both salt and fresh water, the book calls for a sustainable relationship with water in contemporary western culture. 'Deep Blue' will be of interest to students of paganism and religion, environmental researchers and activists, and all those involved in the intersection between religion and ecology.
