Your Trading and Risk

**Trading and Hedging with Agricultural Futures and Options** - James B. Bittman - 2012-10-10
Today's Premier Guidebook for Understanding Agricultural Options and Making Them a Key Part of Management Strategy
Agricultural futures and options represent a vital niche in today's options trading world. Trading and Hedging with Agricultural Futures and Options takes an in-depth look at these valuable trading tools, and presents clear,
them an integral part of your techniques for both hedgers and traders to achieve their goals while minimizing risk. Relying on nuts-and-bolts techniques and examples as opposed to the mathematical models and theory favored by other options-trading manuals this practical, hands-on book discusses many topics, including: How hedgers and traders can use options effectively with realistic expectations Methods to understand price behavior including the "Greeks" (delta, gamma, vega, and theta) The importance of volatility and little-known ways to make it work to your advantage For producers and processors, agricultural futures and options are necessary components for controlling costs and hedging risks. For traders, they are proven vehicles for earning exceptional risk-adjusted profits. Whichever side of the aisle you are on, Trading and Hedging with Agricultural Futures and Options will provide you with the answers you need to effectively use these versatile tools and make business.

Agricultural Marketing and Consumer Behavior in a Changing World - Berend Wierenga - 2012-12-06
As in many other sectors, in agribusiness major changes are taking place. On the demand side, consumers are changing lifestyles, eating and shopping habits, and increasingly are demanding more accommodation of these needs in the supermarket. With regard to the supply: the traditional distribution channel dominators - manufacturers of branded consumer products - are trying hard to defend their positions against retailers, who gather and use information about the consumer to streamline their enterprises and strengthen their ties with the consumer. The agricultural producers,
Meulenberg has made an important contribution to the development of marketing, inside and outside the domain of agriculture.

Agricultural Marketing and Consumer Behavior in a Changing World - Berend Wierenga - 2012-12-06
As in many other sectors, in agribusiness major changes are taking place. On the demand side, consumers are changing lifestyles, eating and shopping habits, and increasingly are demanding more accommodation of these needs in the supermarket. With regard to the supply: the traditional distribution channel dominators - manufacturers of branded consumer products - are trying hard to defend their positions against retailers, who gather and use information about the consumer to streamline their enterprises and strengthen their ties with the consumer. The agricultural producers, meanwhile, face increased regulations with regard to food additives, pesticides, and herbicides. Pressures rise as...
of agriculture. specialized and capital-intensive than that of their predecessors. Finally, the larger political climate is not so favorable to agriculture, which now has to compete in the global market without significant government support. This title describes and interprets changes in the domain of agriculture and food. The contributors develop the theme of taking an interdisciplinary approach to coping with these changes, using concepts and methods developed in general marketing, which are adapted so as to apply to the particular characteristics of the food and agriculture sector. This book is published to honor the distinguished career of Professor Mathew T.G. Meulenberg from Wageningen Agricultural University, on the occasion of his retirement in September 1996. As a scientist, teacher, and advisor to the agribusiness and the government, Professor Meulenberg has made an important contribution to the development of marketing, inside and outside the domain.

Agricultural Futures and Options - Richard Duncan - 1992

"Agricultural Futures and Options provides invaluable information and advice to business-people on both sides of this equation, focusing on the influential North
external factors that cause markets. A host of agribusiness experts give you detailed explanations of the structure and workings of the agribusiness markets, covering everything from major grains and meats to coffee, cocoa, sugar, and soybeans. In addition, external factors that cause price uncertainty - from bureaucracy and weather to outright war - are examined in terms of their effects on food prices."--Jacket.

**Agricultural Futures and Options** - Richard Duncan - 1992

"Agricultural Futures and Options provides invaluable information and advice to business-people on both sides of this equation, focusing on the influential North American and European markets. A host of agribusiness experts give you detailed explanations of the structure and workings of the agribusiness markets, covering everything from major grains and meats to coffee, cocoa, sugar, and soybeans. In addition,
guides you in honing your proficiency at entering orders and anticipating strategy performance. Most importantly, it gives you access to one of the world's leading educators and commentators as he candidly defines the seven trading areas that are essential for successful options traders to master: Option price behavior, including the Greeks Volatility Synthetic relationships Arbitrage strategies Delta-neutral trading Setting bid and ask prices Risk management You will benefit from Bittman's exceptional understanding of volatility, his perceptive examples from the real world, and the dozens of graphs and tables that illustrate his strategies and techniques. Each chapter is a complete, step-by-step lesson, and, collectively, give you the best toolbox of profit-making solutions on the options trading floor. In addition, Trading Options as a Professional comes with Op-Eval Pro, a powerful software that enables you to analyze your trades before you make volatility, graphing simple and complex options strategies, and saving analyses to review later. Don't be left guessing on the sidelines--trade with the confidence of a market maker by following the road map to higher profits in Trading Options as a Professional.

Trading Options as a Professional: Techniques for Market Makers and Experienced Traders - James Bittman - 2008-11-09

Futures Trading in Agricultural Commodities - 1938

Futures Trading in Agricultural Commodities - 1938

Review of Commodity Futures Trading and Its Relationship to Agricultural Producers - United States. Congress. House. Committee on Agriculture. Subcommittee on...
Producers of agricultural commodities regularly face price and production risks. Furthermore, increased global free trade and changes in domestic agricultural policy have increased these risks. As the variability of price increases the variability of revenue, producers are realizing the importance of risk management as a component of their management strategies. One means of reducing these risks is through the use of the commodity futures exchange markets. Like using car insurance to hedge the potential costs of a car accident, agricultural producers can use the commodity futures markets to hedge the potential costs of commodity price volatility. As when gains from a car insurance claim might not exceed the cost of the cumulative sum of premiums, the gains from hedging might not cover the costs of hedging. The primary objective of hedging is not to make money but to minimize price volatility. This guide provides an overview to agricultural hedging to aid producers in evaluating hedging opportunities.

**Commodity Futures Trading** - Chicago Board of Trade - 1994

**Agricultural Futures and Options** - Richard Duncan - 2014-03-14
Agricultural futures and options has been written for the potential and actual users of agricultural futures markets but should also provide a useful introduction to the more academic students of the subject. Divided into three parts, the first examines the North American markets with chapters on Chicago, definitions, hedgers, commodity trading advisors, options, New York and the Winnipeg community. Part 2's study of the European markets looks at soft commodities and the London Fox, the London Grain Futures Market, meat futures, potato futures and soya bean meal futures. Investing and investor protection is the subject of part 3. Guidelines are provided for opening and servicing an account and a further chapter deals with regulation.

Introduction to Hedging Agricultural Commodities with Options - Joseph L. Parcell - 2011

Producers of agricultural commodities regularly face price and production risks. Furthermore, increased global free trade and changes in domestic agricultural policy have increased these risks. As the variability of price increases the variability of revenue, producers are realizing the importance of risk management as a component of their management strategies. One means of reducing these risks is through the use of the commodity futures (or should this be options?) exchange markets. Like using car insurance to hedge the potential costs of an accident, agricultural producers can use the commodity options markets to hedge the potential costs of commodity price volatility. As when gains from a car insurance claim might not exceed the cost of the cumulative sum of premiums, that gains from hedging agricultural commodities might not cover the costs of hedging. The primary objective of hedging is not to make money but to minimize price volatility. This guide provides an overview of hedging to aid producers in evaluating hedging opportunities.
