Gradually since 2003, Turkey's autocratic leader Recep Tayyip Erdogan has sought to make Turkey a great power -- in the tradition of past Turkish leaders from the late Ottoman sultans to Ataturk, the founder of modern Turkey. Here the leading authority Soner Cagaptay, author of The New Sultan -- the first biography of President Erdogan -- provides a masterful overview of the power politics in the Middle East and Turkey's place in it. Erdogan has picked an unorthodox model in the context of recent Turkish history, attempting to cast his country as a stand-alone Middle Eastern power. In doing so Turkey has broken ranks with its traditional Western allies, including the United States and has embraced an imperial-style foreign policy which has aimed to restore Turkey's Ottoman-era reach into the Arabian Middle East and the Balkans. Today, in addition to a domestic crackdown on dissent and journalistic freedoms, driven by Erdogan's style of governance, Turkey faces a hostile world. Ankara has nearly no friends left in the Middle East, and it faces a threat from resurgent historic adversaries: Russia and Iran. Furthermore, Turkey cannot rely on the unconditional support of its traditional Western allies. Can Erdogan deliver Turkey back to safety? What are the risks that lie ahead for him, and his country? **Turkey's Foreign Policy and Security Perspectives in the 21st Century** - Sertif Demir - 2016-04-23
This book aims at analyzing Turkish foreign and security policies in the 21st century. Turkey’s foreign and security policies have become the focus of academic discussions since Turkey is located in the middle of the most unstable region in the world. Turkey’s self-assured foreign policy has similarly attracted the attention of academicians worldwide. Meanwhile, Turkey’s security policy has also been the subject of discussions as the country has been struggling with ethnic terrorism for 35 years. Furthermore, the US invasion of Iraq and the recent Syrian civil war, along with other factors, have caused religious power throughout the Middle East, which has heavily impacted on Turkey’s security. Turkey’s longstanding problems with its neighbors have also affected the general characteristics of its foreign policy, particularly leading to its securitization.

Turkish Foreign Policy Since 1774 - William M. Hale - 2013

This revised and updated version of William Hale's Turkish Foreign Policy 1774-2000 offers a comprehensive and analytical survey of Turkish foreign policy since the last quarter of the eighteenth century, when the Turks' relations with the rest of the world entered their most critical phase. In recent years Turkey's international role has changed and expanded dramatically, and the new edition revisits the chapters and topics covered in light of these changes. Drawing on newly available information and ideas, the earlier historical narrative while preserving the clarity and accessibility of the original. Combining the long historical perspective with a detailed survey and analysis of the most recent developments, this book fills a clear gap in the literature on Turkey's modern history. For readers with a broader interest in international history, it also offers a crucial example of how a medium sized power has acted in the international environment.

The Influence of the European Union on Turkish Foreign Policy - Özlem Terzi - 2010
Rich in case studies and interviews with actors involved in policy making in Brussels, Ankara and Istanbul, this book questions the influence of the European Union on the making of Turkish foreign policy since it was declared a candidate country in 1999. It is a valuable resource for students, researchers and scholars interested on the transformative power of the EU and the role of Turkey's relationship with its neighbours.
As it became evident that the Allies were winning World War II, Turkish policy-makers struggled to achieve their objectives in the shifting circumstances of wartime diplomacy. Edward Weisband's detailed description of Turkish foreign policy from 1943 to 1945 reveals that it was complicated by the fact that its two principal aims dictated contradictory positions. The first aim was the priority of peace over expansionism—this implied a noninterventionist policy. On the other hand, the belief that the Soviet Union represented the primary threat to the security of the Republic often made intervention to contain Russia seem necessary for national defense. Turkish officials became determined to influence the postwar settlement towards an equilibrium among the great powers that would limit Soviet expansionism, which the Turks assumed they could not do alone. Consequently, they envisioned the contours of the Cold War. After outlining the historical origins of the ideology that lay behind Turkish diplomacy, the first part of the book concentrates on the policy-making process in Ankara and assesses the relative influence of individual leaders and institutions. The second part analyzes both Turkey's responses to the exigencies of war and the general nature of small state diplomacy. Originally published in 1973. In this regard, this research aims to analyze whether there has been a changeover in Turkish Foreign Policy and if so, what were the consequences regarding Turkey’s relations with its neighbors. **Islamism, Populism, and Turkish Foreign Policy**
Burak Bilgehan Özpek - 2020-05-21

This comprehensive volume analyses the phenomena of populism and Islamism in Turkey under Justice and Development Party (JDP) rule since 2002, and its impact on the country’s foreign policy. The authors seek to identify the meanings of ‘populism’ and ‘Islamism’ in the Turkish context and their relationship to democracy there, exploring the extent to which they may explain the apparent rise of authoritarianism and illiberalism under the JDP and especially under President Recep Tayyip Erdogan, and address the tensions between Turkey’s ‘western’ and ‘Muslim’ discourses and the politicization of history in the ‘new Turkey’. They examine the implications of these developments for Turkey’s EU accession prospects and its western alliances, explore the impact they have had on the country’s approach to the Arab Spring, and consider their relationship to Turkey’s status as an emerging economy in an economically globalizing context. The volume also debates whether Turkish populism is unique to

Strategy and Strategic Discourse in Turkish Foreign Policy - Hasan Yükselen - 2020-03-03
This book provides a critical realist analysis of Turkish various periods from the Turkish National Struggle to the contemporary Justice and Development Party Government. It discusses TFP within the critical realist framework, employing the concept of differences in continuity to demonstrate how agency and structure interacted, and how some discourses arose and others failed in the history of the Turkish Republic. The book also applies the concepts of strategy and strategic discourse to reveal how real-world strategic preferences correspond to the narration. Lastly, the author argues that the underlying structural forces have endured, despite Turkey’s persistence in enhancing the agency’s role, ultimately leading to differentiation between “what is spoken” and “what is actualized”.

This unique book investigates the complex transformation of Turkey's foreign policy, focusing on changing threat perceptions and the reformulation of its Western identity. This transformation cannot be explained solely in terms of strategic choices or agency driven policies but encompasses power shifts and systemic transformations. Is Turkey shifting its axis? Will this affect its traditional Western-oriented foreign policy? The book begins by discussing the relationship between security and globalization, using examples of Turkey's regional positioning. It then focuses on to what extent the 'traditional' discourse on security in Turkish politics, which prevailed during the Cold War era and beyond, has undergone a change in the new era. This timely book is a much needed account of how pragmatism rather than ideology is the main determinant in Turkey's current foreign policy and should be read by all looking for a fresh and stimulating take on Turkey's response to globalization and the internationalization of security in the 21st Century.

What will power look like in the century to come? Imperial Great Britain may have been the model for the nineteenth century, Richard Rosecrance writes, but Hong Kong will be the model for the twenty-first. We are entering the Age of the Virtual State -- when land and its products are no longer the primary source of power, when managing flows is more important than maintaining stockpiles, when service industries are the greatest source of wealth and the greatest natural resources. Rosecrance's brilliant new book combines international relations theory with economics and the business model of the virtual corporation to describe how virtual states arise and operate, and how traditional powers will relate to them. In specific detail, he shows why Japan's kereitsu system, which brought it industrial dominance, is doomed; why Hong Kong and Taiwan will influence China more than vice-versa; and why the European Union will command the most international prestige even though the U.S. may produce more wealth.

**Turkey's New World** - Alan Makovsky - 2000

During the long Cold War era, Turkish foreign policy was restricted to just a few basic, if difficult and crucial, questions: how to ward off the Soviet threat, how to protect Turkish interests vis-à-vis Greece and Cyprus, and how to maintain and strengthen ties with the United States and NATO. Slightly less pressing but still important were questions of how to further Turkey's integration with Western Europe and, during the latter part of the Cold War, how to defend against terrorism supported by neighbors like Syria, Iraq, and Iran. These issues were problematic, rendered more complicated in combination. As the U.S. arms embargo of Turkey in the mid-1970s bears witness, managing relations with Cyprus and Aegean rival Greece while building bilateral ties with Washington were goals not always easily reconciled. The content is divided into four complementary sections that explain and exemplify transnational (f)actors in the context of Turkish foreign policy. The first addresses theoretical and ideational frameworks that illustrate the relevance of a transnational account, while the second demonstrates the possibility of developing transnationally oriented approaches even in historical cases, going beyond a presentist focus. In the third and fourth sections, the book focuses on two prominent non-state actors, namely diaspora communities and non-governmental organizations, which operate at the interstices of the domestic and the international. This allows the authors to highlight the significance of transnational dynamics in Turkey’s foreign policy.

The AKP adopted a proactive foreign policy to create ‘strategic depth’ by expanding Turkey’s zone of influence in the region, drawing on the opportunities of geography, economic power and imperial history to reconnect the country with its historical hinterland. Yet despite early promise, this policy came undone after the Arab upheavals of 2011 and has seen Turkey increasingly at odds with its neighbours and the West. Arab upheavals of 2011 and Middle East have precipitated a serious decline in Turkish regional influence, reversing earlier gains in influence after the AKP came to power. However, despite these foreign-policy defeats, the AKP has shown little indication that it is willing to scale back its ambitions, insisting that it stands on the right side of history – drawing a clear distinction between Turkey and the West.

Turkey’s Pivot to Eurasia - Emre Erşen - 2019-05-21
This book discusses and analyses the dimensions of Turkey’s strategic rapprochement with the Eurasian states and institutions since the deterioration of Ankara’s relations with its traditional NATO allies. Do these developments signify a major strategic reorientation in Turkish foreign policy? Is Eurasia becoming an alternative geopolitical concept to Europe or the West? Or is this ‘pivot to Eurasia’ an instrument of the current Turkish government to obtain greater diplomatic leverage? Engaging with these key questions, the contributors explore the geographical, political, economic, military and social dynamics that influence this process, while addressing the questions that arise from the difficulties in reconciling Ankara’s strategic priorities with those of other Eurasian countries like Russia, China, Iran and India. Chapters focus on the different aspects of Turkey’s improving bilateral relations with the Eurasian states and institutions and consider the possibility of developing a convincing Eurasian alternative for Turkish foreign policy. The book will be useful for researchers in the fields of politics and IR more broadly, and particularly relevant for scholars and students researching Turkish foreign policy and the geopolitics of Eurasia.
