Quality control (QC) is a process by which entities review the quality of all factors involved in production. ISO 9000 defines quality control as “A part of quality management focused on meeting quality requirements.” This approach places emphasis on three aspects (embodied in standards such as ISO 9001). Elements such as controls, job management, defined and well. In this effort, all members of an organization participate in improving processes, products, services, and the culture in which they work.
